SUPPLEMENTARY INFORMATION:

Background Information

In connection with the proposed rule on Pipeline Integrity Management in High Consequence Areas, OPS plans to propose related rules governing operator communications with local public officials and agencies. To assist in this effort, the OPS Technical Advisory Committees created an Integrity Management Communications Subcommittee to focus on communications issues and to report back to the full Advisory Committee. OPS expanded this Subcommittee to form a team with equal representation from the public, government agencies, and the pipeline industry, and to consolidate several related efforts.

The Team will provide feedback, insight, and information to the Advisory Committee on the content and delivery of information conveyed to local officials and the public about pipeline operations, systems, and the risks they pose in or near high consequence areas. The Advisory Committee will provide pipeline communication recommendations to OPS for consideration in drafting the Integrity Management Communications rulemaking. The Team will also assist OPS in finalizing a primer to educate local officials on pipelines and their operations.

The topics for discussion for this meeting include discussions of the following: information that is needed by various groups: landowners/tenants along pipeline rights-of-way; local and regional emergency response officials; excavators and the general public; review of existing materials used by pipeline operators for public education; results from a public awareness survey conducted by the American Petroleum Institute and focus groups sponsored by the Interstate Natural Gas Association of America; Office of Pipeline Safety website materials; information currently available under the Freedom of Information Act; and pending pipeline legislative proposals for community right-to-know.
